## INIF History

2010 : Parliament passed the Law on the Protection of Enterprises and Technology Based Organizations and the Commercialization of Innovations and Inventions (PETBOCI)

June 2012: Approval of the statute of INIF by the cabinet of ministers

August 2012: First meeting of the board of trustees

October 2012: Announcement of the mandate of PETBOCI by the government

January 2014: Allocation of facilities to new technology-based firms (TBFs) began

## The main purposes of Establishing INIF :

- Assisting the implementation and development of knowledge-based economy
- Completing the «idea to market» chain
- Commercialization of innovations, inventions and research results
- Making the knowledge applicable through the provision of assistance and financial services to support knowledge-based institution and companies

## Center for International Science and Technology Interactions

This center was formed with the aim of laying the groundwork for increasing scientific, technological and innovation relations with other countries, as well as achieving a clear and significant position in regional and global trade of knowledge-based products.

Due to its cross-sectoral position, the Center for International Science and Technology Interactions manages the macro-coordination of technology activities, innovation in bodies and institutions related to abroad, export of knowledge-based goods and services, supply and demand of technology (technology transfer), laying the groundwork and development of technology diplomacy, etc. .

## Introduction:

Tech Export Services Corridor (TESC) provides Iranian high-tech and medium-tech companies with export support services. TESC facilitates the export process for Iranian manufacturers by providing services in the areas of marketing, consultancy, and international alliances.

TESC chooses producers providing the highest quality products based on Export Readiness Assessment (ERA) and supports competent manufacturers in promoting their export share. Therefore, TESC is capable of certifying the quality of products and reliability of Iranian producers in high-tech fields and creating a trustful environment for collaboration between Iranian and foreign companies, as well.

## ABOUT COMPANY

Arman Tajhiz Medisa (ARAMED brand) is a software and hardware engineering company with over 10 years of experience in Musculoskeletal (MSK) health solutions. According to the WHO statistics, 1.7 billion people worldwide suffer from MSK conditions. We are proud that our products, including smart Ortho-Station MSK labs, different types of plantar pressure analyzers, foot scanning devices, digital gadgets, spinet spinal mouse, CAD/CAM orthotics software and manufacturing machines, etc. are used in thousands of medical centers to provide the best diagnostic and treatment services for MSK patients. Contact us to learn more about our products and solutions.

## PRODUCT

### Musculoskeletal LABs:

- \* OS2 Ortho-Station LAB
- \* PS2 Posture-Station LAB

### Plantar Pressure Platforms:

- \* PEDYN2300 Pressure Plate
- \* PEDYN4600 Pressure Plate
- \* PEDYN6900 Pressure Plate

### Foot Scanning Systems:

- \* PIXO 3D Laser Footscanner
- \* 2D Footscanner

### Spine & Posture Analysis Systems:

- \* SPINET Spinal Mouse
- \* IRST 3D Spine & Posture Analysis System
- \* LLD Simulator

### Postural Gadgets:

- \* ENRO Digital Tilt-meter
- \* ENRO+ Digital Tilt & Goniometer

### CAD/CAM Orthotics Design Software:

- \* CADSOL3D (Free)
- \* CADSOL3D-Pro
- \* CADSOL3D-Pro (Admin)

### Insole Manufacturing Machines:

- \* ATM-50 Milling Machine
- \* ATM-50 Pro Milling Machine
- \* ATP-40 3D Printers
- \* ATP-40\*2 3D Printers

### Custom made Orthotics:

- \* EVA Insoles
- \* 3D Printed Insoles
- \* Baltec Custom Made Sandals

## BEHFA Calibration Lab.

### ABOUT COMPANY

Founded in October 2010, the knowledge-based calibration laboratory, BEHFA Co. began its operations. With the help of the Almighty, in February of the following year, BEHFA was able to receive Accreditation Certificate, ISO/IEC 17025, from NACI (National Accreditation Center of IRAN). The laboratory's mission is to cater to the specific needs of industries, such as pharmaceuticals, food, oil, gas, petrochemicals, steel, cement, laboratory equipment, water, and wastewater, as well as research and scientific centers in the country. In November 2019, the laboratory underwent an evaluation and audit for compliance with the international ISO/IEC 17025:2017 standard by the National Accreditation Board for Testing and Calibration Laboratories (NABL) of India.

### PRODUCT

Calibration / Qualification of the following parameters:

Temperature, Mass, Humidity, Pressure, Volume, Density, Refractometer, Spectrophotometer, wavelength Filter, Neutral Density Glass Filter, pH, Conductivity, Viscometer, Polarimeter, Titrator & Karl Fisher, HPLC, GC, Particle Counter, IR, TOC and laminar Hood

## ABOUT COMPANY

ISO Visit is a smart platform to optimize safe and functional communication between doctor and patient. On the other hand, there will be a complete and practical system for maintaining and managing patients' medical records in the office, and it will solve many problems of maintaining and searching patients' records for doctors.

According to the expertise of the consulting doctor and the level of satisfaction of other patients with the doctor, patients can receive an online visit from the doctor of their choice and after completing the consultation, express their level of satisfaction with the doctor so that other patients can be informed about the opinions of other clients.

## PRODUCT

Online medical visit site

Therapeutic herbal extracts

Herbal treatment shampoos

Herbal cream therapy

Etelaresany Payvand Dadeha (EPD)

12

## ABOUT COMPANY

A group of Health Informatics professionals and physicians established EPD On May 14, 1998. During past 25 years of operations, we had developed knowledge in health informatics processes and standards like (HL7, standard Coding, HIPPA, DICOM, etc.)

## PRODUCT

EPD has a wealth of experience in producing various electronic healthcare solutions, including but not limited to:

- Hospital Information System (HIS)
- Clinical Information System (CIS)
- Radiology Information System (RIS)
- Dental Information System (DIS)
- Appointment System
- Picture and Archiving Communication System (PACS) + AI (Using AI for image processing)
- Business Intelligent in Health Care (BI)
- Customer ordering software

Varian Pharmed

13

## ABOUT COMPANY

Varian Pharmed is a privately-owned pharmaceutical company which was established as a knowledge-based firm in 2009. Our strategic and customer-focused approach to developing, producing and marketing high-quality affordable medicines has successfully made us one of the first respected generic companies (which develop high-tech medicines) in Iran. Collaboration, innovation and scientific excellence are our main principles. We are one of Golrang industrial group subsidiaries. It consists of nearly 100 subsidiaries, operating in regional, national and international levels, more than 30 Manufacturing sites, 60 product groups, \$1 billion annual turnover and approximately 17500 employees

## ABOUT COMPANY

Noura Co. headquartered in Isfahan, Iran, is a leading provider of metal-based 3D printing technology in Iran. Noura is a young and innovative company (founded in 2013), but its strength lies in expertise of the co-founders who have been active in additive manufacturing sector since 2003.

The company's core business includes supplying of metal 3D printers and offering 3D printing services. Regarding the system supplying, Noura Co. focuses on the development, manufacturing and sale of metal 3D printer machines in the field of selective laser melting (SLM). Besides, the company offers its developed powder feeding systems for direct metal deposition technology.

Regarding the service providing with experience and know-how gained so far, Noura is its customer competent partner in the development, research, production of prototypes, and end-use parts as well as delivering new solutions to their problems. Currently, 3D printing service activities including material development for SLM, medical and dental solutions, and production of prototypes and components using SLM, DMD, SLS, DLP and FDM technologies.

## PRODUCT

### NOURA M300:

Noura M300, is equipped with a 500 W single fiber laser and offers a  $\varnothing$  300 mm x 325 mm building volume.

The proper quality of the laser beam and its high resolution, enables the machine to produce high quality metallic parts with homogeneous mechanical properties.

A monitoring system is embedded inside the building chamber which helps the operator to have more control on the production process.

### NOURA M120:

Noura M120 offers a  $\varnothing$ 125 mm x 150 mm building volume which has made this machine best suited for production of dental prosthesis, implants and small industrial parts.

[info@noura3dp.com](mailto:info@noura3dp.com)

### ABOUT COMPANY

NurAfarin is a knowledge-based Iranian holding, active in the field of Intelligent Laser Systems. NuraMed is a startup, under the management of this holding. NuraMed is active in the field of skin and hair beauty medical equipment (Diode Laser), which has obtained the IEC 60601, 62304, 60825, and ISO13485 standards.

We are looking for companies that are interested in investing for the co-production of the kind of medical and hair removal laser in Oman.

### PRODUCT

The main advantage of Diode laser is that it uses different wavelengths: 808nm, 755 nm, 1064 nm in a single handpiece or in three separate handpieces. So, it can cover a wide range of hair and skin colors.

## ABOUT COMPANY

Nafas Zist Pharmed Pharmaceutical Co. is a Knowledge-Based Company which has been established by some experienced Pharmacists for manufacturing high-tech pharmaceuticals such as DPI products.

Nafas Zist Pharmed since 2019 has been producing DPI capsules as the pioneer and first Iranian pharmaceutical company.

## PRODUCT

DPI capsules (Dry Powder Inhalers) are novel and high-tech pharmaceutical dosage forms and have a limited number of manufacturers around the world because of very complex technology and manufacturing processes. Tio-Toriva® is the brand of Tiotropium Bromide manufactured by this company and is used for the treatment of COPD.

Tiotropium is a long-acting antimuscarinic agent (LAMA), often referred to as an anticholinergic in the respiratory tract that exerts its pharmacological effects by inhibiting smooth muscle M3 receptors, which leads to the opening of the bronchi.

Bronchodilation after inhalation of tiotropium has a local mechanism and is concentrated at the site of action.

Tiotropium has stood as a world top sales pharmaceutical product since it was launched in the market.

Tiotropium market and other DPI products have been increasing every year and this market is over 20 billion dollars in 2023.

# Kanan Nano Structure - KNS

19

## ABOUT COMPANY

KANAN Nano Structure Co. (KNS) is a pioneering manufacturer in production of nanofibrous advanced wound dressings. KNS was established in 2017 and started its activity as a knowledge-based company in the field of research, development and production of advanced wound care products especially for diabetic ulcers, burns, surgical and pressure wounds, and focuses on research and development of E.B dressings as well as skin masks. KNS seeks to serve human health by developing the border of science and technology.

## PRODUCT

KNS products are based on nanofibers made of biocompatible polymers and essential oils. The KNS advanced wound dressings have got specific microstructure similar to natural skin, high antibacterial activity, porous and breathable surface, etc. The products are as bellowed:  
TedaPan: Advanced nanofibrous wound dressing for different kinds of wounds and ulcers such as diabetic ulcers, bed sores, etc.

TedaBurn: Advanced wound dressing for burn wounds.

TedaCut: Advanced wound dressing for surgical wounds.

Kimia Kala Razi

21

## ABOUT COMPANY

Kimia Kala Razi Co. with the distinctive title “Kimazi” was founded in the year 2012. Taking advantage of High-tech Formulations (Nano and Liposomal technology) we, Kimazi aimed to produce effective, innovative and high-quality products in the field of Pharmaceutical, Cosmeceutical and Supplement.

Our APIs are supplying from reputable foreign and local manufacturer like DSM (Switzerland), Ortscheit (Germany) ,... .

Local market: Through working with the main distribution channels our distribution network covers total market and presents in all 31 provinces of Iran visiting 18,000 pharmacies.

Foreign market: Our products have been exported to neighboring countries Oman, Azerbaijan, Iraq, Afghanistan and Pakistan.

Pouya Fannavarán Yeson

23

## ABOUT COMPANY

Pouya Fannavarán Yeson, has started working in the field of cold plasma technology since 2019 with commercial and industrial goals. With more than a decade of experience in new technology management and commercialization, the founders of Yeson are now focusing on the design and production of cold-plasma air purifiers and sanitizer (AIROSUN). Airosun is a knowledge-based product and is licensed to manufacture medical equipment, nanotechnology certification, patent and European CE.

Yeson is a combination of knowledge management and commercialization experience of technology-based products that has started its activity with the design and production of purification and sanitizer devices based on cold plasma technology. Yeson's motivation, considering the numerous applications of cold plasma technology in various industries, is the production of advanced equipment with cold plasma technology and the development of various applications in various industrial fields, including food, agriculture, textiles, etc.

# Nano Synthes™

# 25

## ABOUT COMPANY

NanoSynthes™ was established in 2020 with main mission of providing solutions for the production of lipid- and polymer-based drug nanocarriers. The company has successfully developed microfluidic-based equipment for the production of nanocarriers at laboratory scale (INSIGHT®) for R&D and preclinical purposes; and industrial scale (INSPIRE®), for scale-up and commercialization of nanocarriers. The operation of both equipment is based on microfluidic technology that allows for convenient modulation of particle size, PDI, and encapsulation efficiency of nanocarriers.

## PRODUCT

Products of NanoSynthes™ includes two equipment:

INSIGHT® is a benchtop equipment for small-scale production of nanocarriers.

INSPIRE® is a for industrial scale production of nanocarriers.

## Zist Gostaran Koosha

### ABOUT COMPANY

Zist Gostaran Koosha; is IVD reagents manufacturer. Having started its operations in 2006, one of the well-established biochemistry and serology reagents manufacturer companies in IRAN.

Our products are being released in the market with 'RITON BIO ANALYSE' brand name.

There are 3 quality management stations in our producing line and we are the honor of ISO 9001 & 13485 Certificate for our IVD Reagents achieved in 2019.

### PRODUCT

Biochemistry and serology Reagents

## Get to know us better

Pars Rastak company began its work with the aim of holding exhibitions and international conferences in 1992.

Now that 29 years have passed since the creation of the company, more than 100 international exhibitions, conferences and B2B Meetings, has been held in more than 10 foreign countries and different cities of Iran by Pars Rastak Company.

We can provide full services for faster market entry process ,increase success rate ,reduce initial investment ,ability to test market before making any long term commitments, event management ,corporate seminars.

We have a professional team and variety of services that will assist you with development of well-structured business plan and help you understand the dynamics of Iranian market. Also we can provide business services in Iraq, Syria, Kurdistan territory, Afghanistan, Qatar and Oman markets.
