

IRAN Delegation

Decarbonising.
Faster. Together.

2-5 October 2023
Abu Dhabi, UAE

Center for International Science and Technology cooperation

About us

This center was formed with the aim of laying the groundwork for increasing scientific, technological and innovation relations with other countries, as well as achieving a clear and significant position in regional and global trade of knowledge-based products.

Due to its cross-sectoral position, the Center for International Science and Technology cooperation manages the macro-coordination of technology activities, innovation in bodies and institutions related to abroad, export of knowledge-based goods and services, supply and demand of technology (technology transfer), laying the groundwork and development of technology diplomacy, etc.

Tech-Export Services Corridor

About us

Tech Export Services Corridor (TESC) provides Iranian High-tech and medium-tech companies with export support services. TESC facilitates the export process for Iranian manufacturers by providing services in the areas of marketing, consultancy, and international alliances.

TESC chooses production providing the highest quality product based on Export Readiness Assessment (ERA) and supports competent manufacturers in promoting their export share.

Therefore TESC is capable of certifying the quality of product and reliability of Iranian producers in high-tech fields and creating a trustful environment for collaboration between Iranian and foreign companies, as well.

Abdal Industrial Projects Management Co.(MAPSA)

About Company

Mapsa company was established in 1999 and is one of the most reputable Iranian companies in the field of industrial projects management ,execution and educational activities by using up to date technologies based on value creation and knowledge based criteria.

Mapsa's fields of activities are as follows :

- Various services in upstream and downstream of oil & gas & energy industries
- Engineering services
- Develop of petroleum soft wares (Pvt pro.Acid pro.Flow pro.MI pro ,etc)
- Management control
- Technical inspection
- Core analysis laboratory
- Coring services
- H2S safety services
- Mud logging services

Ahar Power Station Services

About Company

Ahar Power Station Services Company (www.aharco.com), with more than 24 years of experience in various projects in the power generation industry of Iran, is well known today as one of the most famous and reliable companies among the Ministry of Energy and power generation sector in Iran. This company successfully upgraded more than 7000MW produced electricity in Iran with its products.

This company has a specific products for each Refinery, Petrochemical and Power Stations.

Aryatash

About Company

Aryatash Company owning experienced managers, professors of Power and Water Industry University and qualified experts was established in the field of engineering and technical services in 2010.

The establishers of Aryatash Co. with more than 25 years' experience in rotating equipment troubleshooting and industrial automation are able to take responsibility for various engineering services in such fields.

Aryatash Co. also focuses on professional and specialized approaches in preventive maintenance (PM) and energy management.

Our company is capable of designing and producing a set of apparatus such as variable frequency drives (VFDs) as well as offering methods in energy management and using modern equipment of European and Asian companies.

Excellent quality and suitable price of Aryatash products bring about satisfaction and trust for our customers.

Atiyeh Hi-Tech Basic Researchers

About Company

To improve the quantitative and qualitative level of domestic production and promote the “Made in Iran” brand, the company has studied the manufacturing situation and its challenges in the industries and has taken steps to solve the technical issues of manufacturing in the country.

The company’s target is the development of indigenous and localized technologies and the benefit of The capacity of knowledge-based and technological companies to meet the needs of industries.

“Made in Iran” is all the goods and services that Iranian experts have played a key role in creating. Taking advantage of valuable technical and technological capabilities outside of Iran to improve the status of domestic production is welcomed.

Behbood Sanat Mahan

About Company

Behbood sanat Mahan Co. is a company located in Isfahan, Iran with more than 10 years experience in the field of surface engineering.

BSM is one of the famous knowledge base companies in Iran and it is one of the top 5 companies in this category in recent years. This company utilizes an expert team, continuous communications with domestic and foreign scientific and academic centers and high technology equipment in the field of surface engineering to provide reliable services for the various industries such as oil, gas, petrochemical, mining, steel, etc.

BSM is a full service company offering clients several services in its field such as: Thermal Spraying (HP/HVOF, APS, and Flame Spray), Cladding (PTA, GTAW, and GMAW), and Plasma Nitriding. In addition, the company also has possibility to manufacture all of parts that need one of the surface technology methods for life time optimization.

Iranian Banezh

About Company

Iranian Banezh Company Is One of The Knowledge-Based Companies Located in Pardis Technology Park, Which Is in Line with The Production of Rotating Parts and Equipment for The Oil, Gas and Petrochemical Industries, with The Aim of Providing the Full Cycle of Manufacturing and Production of Spare Parts for The Aforementioned Industries in Terms of Design, Reverse Engineering, And the Preparation of Birth Certificates. Technical Parts Manufacturing, Manufacture and Production and Technical Inspection of Parts, Equipment and Machinery.

Iranian Banezh Consists of Various Units and Working Groups, Including Technical Engineering, Laboratory Services, Research and Development, Production and Technical Inspection, Which Has Been Able to Take Advantage of The Powerful Structure and Experienced Expert Staff with Regard to The Innovations and Innovations Used and The Scientific Approach. In All Stages, As Well As Using Advanced Equipment, Offer Its Services in Compliance with International Standards.

Kish Abdal Industrial projects Management Co.

About Company

MAPSA Company started their activities in the field of drilling services with the cooperation of Pars Oil & Gas Company (POGC) in 2007. In order to develop drilling activities, MAPSA Kish was established in Kish Island in 2008 and in later years the Company founded a unique Base in this Island. In parallel with drilling services development, MAPSA took necessary actions to purchase and put into operation the first mud logging units in 2011- 2012. Regarding the H2S safety services, MAPSA possessed MIS-Int. At the present time, MAPSA privately owns 6 Mud Logging units and 15 H2S Safety Services units.

MAPSA Kish Company is actively involved in providing the following services:

1. Mud Logging Services
2. H2S Safety Services
3. Fishing & Rental services
4. Inspection services

MAZID (Knowledge-Based industrial group)

About Company

Mazid Group is an industrial enterprise consisting of Dana Eghtesad Mazid Company as a holding company and Dez Electronic Jonoub Company as a parent company and more than 8 subsidiary and affiliated companies and specialized groups. This group is active in the fields of research, engineering, manufacturing and services in the fields of instrumentation, telecommunications, mechatronics, control, inspection equipment and design of production and process lines.

In addition, industrial projects are engaged in various investment frameworks.

With the development of indigenous knowledge and the acquisition of superior technology, the group has designed different advanced industrial equipment, including electromagnetic inspection equipment, fluid flowmeters, downhole instruments, data loggers, telemetry and monitoring systems, level gauges, etc. and produces.

Data transmission systems based on oil and gas pipelines, microbiology analysis systems, gravity water transmission leakage analysis systems, etc. It is one of the products of the group, which is at the world level.

Nasim Sobh Farda PJSCO.

About Company

NASIM SOBH FARDA PJS Co. is one of the Pioneer Companies expert in Industrial Gas sector of IRAN.

We Produce High Purity Industrial and Technical Gasses as well as Gas production and processing systems.

We are the only private owned company, producer of high purity Hydrogen Gas in IRAN and the only manufacturer of the Alkaline pressurized Electrolyzers (Hydrogen Production Machines) in the Middle East.

We also make Gas Purification systems and also Gas mixing/ processing systems.

Petro Pazouhesh Ahoura

About Company

This company is trying to take steps towards the development of the oil and gas industry of our beloved country with the help of the young and talented force of the country. The activities of this company are mainly divided into two categories: production of laboratory equipment and provision of services in the field of geological sciences and oil and gas engineering. The following are some of the licenses and awards that this company has succeeded in obtaining.

Rayan Energy Hekmat Pars

About Company

Rayan Energy is an active company in the field of designing and manufacturing ignition systems for gas turbines, flares, burners, boilers, furnaces and incinerators, as well as temperature measurement systems (RTDs, thermocouples, and ionizations). Technical knowledge alongside experience and expertise has enabled Rayan Energy to excel in this field. Our capital is our team, sensitivity towards our responsibilities, in-depth knowledge of the oil and gas industry, significant familiarity with related regulations and principles, as well as being accountable and responsible for the services we provide.

Sorena Sanat

About Company

Sorna Sanat Company is a private company that is active in the design and construction of new factories and machines for the processing of minerals.

The advantages of this company's refinery sulfur granulation plant compared to other companies:

- Capacity of more than 1500 tons per day
- Granulation size tolerance of maximum 4 mm (4-6 mm)
- Much higher hardness of granulation
- 50% reduction in water consumption
